

Subject Index

A

Absolute thresholds 173
Activity 57
Aggressive behavior 305
Alcohol 81, 173, 185
Aminophylline 305
Amphetamine 45, 199, 205, 317
— d- 49, 179, 211, 293
— l- 49
Analgesia 57, 103, 133
Analgesimetric procedure 119
Animal models 293
Anorexia 45
AOAA 191
Apomorphine 49, 233, 239, 317
Automatic registration of behavior 239

B

Baboons 5
Baclofen 145
Barbiturate dependence 41
Behavior 279, 327
— aggressive 305
— social 293
— stereotyped 211, 233, 239
Benzoic acid derivatives 249
Body weight 269, 279
Breaking point 5
Brain amines 119, 279
— catecholamines 41
— NE turnover 335
Bufotenin 255

C

Caffeine 49, 305
Cannabis 217, 309
Catecholamines 327
Caudate 261
Central grey 261
Children 157
Chlordiazepoxide 153, 211
Chlorimipramine 93
Chlorphentermine 5
Chronic administration 335
— treatment 317
Cingulate cortex 261
Circadian rhythm 113
Classical conditioning 21
Clinical 225
Clonidine 49, 61
Clonic convulsions 235
Clozapine 69, 75, 195
Cocaine 5, 49
Compulsive gnawing 61
Conditional emotional response 103
Consolidation 191
Convulsions 41, 75
Copper 309

Corticosterone 103
p-CPA 139
Cross tolerance 37
CSF 5-HIAA 195
Cyclizine 21
Cyclohexamine 27, 37

D

Decarboxylase inhibitor (MK-486) 343
Depressant drugs 185
Depression 167
Desmethylinipramine 335
Dexamphetamine 61
Diazepam 111
Diethylpropion 5
Dimethoxyphenethylamine 255
Discriminated Sidman avoidance 87
Discrimination learning 127
Disinhibition 111, 301
Dopamine 1, 157, 317
— metabolism 163
— receptors 233
Drug abuse 41
— discrimination 87
— screening 87
— self-administration 5

E

EEG 69
Emetic systems 21
Escape 153
Estradiol benzoate 179
Ethanol 15, 139, 153
— dependence 287
— syndrome 287
— withdrawal 287
Ethchlorvynol 221
Event-related potentials (ERPs) 15
Experience 57
Exploratory behavior 179
Extinction 301
Extraversion 199

F

Fenfluramine 5, 49
Fixed-ratio schedules 153
Food consumption 111
— presentation 153
— restriction 93
Forced motor activity 27

G

GABA 127, 145, 191
Genetic differences 185
Genotype 57
Glare-light adaptation 81
Growth 103

H

Hallucinogens 87
Hemiretina differences 173
Hemisphere asymmetry 173
Hippocampus 261
HN,N-dimethyltryptamine 255
5-HT 61, 139
5-HTP 343
Human subjects 15, 69, 75, 81, 115, 145, 157, 167, 173, 195, 199, 217, 221, 225, 249, 327
Hyperactivity 205
Hypnosis 217
Hypnotic 221
Hypothermia 269, 309

I

Imipramine 93
Indolealkylamines 255
133-Xe Inhalation method 115
Inhibitory transmitter 127
Insomnia 69, 221
Interactions 309
Intramuscular 225
Iprindole 335
Isolation 205

K

Kinetic figural aftereffects 199

L

Lateral dominance 173
Learning 249
Lithium 113
— treatment 163
Locomotor 269
— activity 93, 239, 317, 343
Loss 139
Loxapine 225

M

Maintenance 139
Marijuana 15, 81, 217
Maternal behavior 93
Medial raphe 133
Mental functions 115
Mescaline 255
Memory 191, 249
Methadone 133
Methoxamine 61
Methylphenidate 49
— induced stereotypy 1
Mice 1, 27, 37, 57, 61, 113, 185, 233, 309, 317, 343
Midbrain reticular formation 261
Modified Bovet-Gatti profiles 87
Monkeys 153
Mood 327

VIII

Morphine 57, 103, 119, 133, 261, 269
 Mouse-Killing 305

N

Naloxone 261
 Narcotic antagonists 269
 Neonatal addiction 103
 Neophobia 111
 Nerve impulses 261
 Neuroleptics 239
 Neutropenia 75
 Noradrenaline 61, 317
 — turnover 205
 Noradrenergic receptor blocking agents 61
 Noveril 167
 Nursing 93

O

Open field 103, 179
 — activity 239
 Opiates 327
 Oral 225
 Oxotremorine 1, 37

P

Pain thresholds 305
 Paranoid schizophrenia 293
 Parkinsonism 75, 145
 Pentobarbital 153
 Pentyleneetetrazol 235
 PGE₁ 235
 PGF_{2α} 235
 Phencyclidine 27, 37
 Phenethylamines 249

Physical dependence 269
 Physostigmine 37
 Piracetam 115
 Plasma levels 225
 Pre- and postsynaptic alpha-adreno-
 receptors 61
 Presenile dementia 115
 Primary suggestibility 217
 Probenecid 157
 Prochlorperazine 21
 Progressive ratio 5
 Prolactin 167, 255
 Protracted tolerance 103
 Psilocybin 255
 Punishment 211

Q

Quipazine 49

R

Raphe magnus 133
 Rate-dependence 49
 Rat pregnancy 93
 Rats 21, 41, 45, 49, 87, 93, 103, 111, 119,
 127, 133, 139, 163, 179, 191, 205, 211,
 235, 239, 255, 261, 269, 279, 287, 293,
 301, 305, 309, 335
 Rearing and grooming behavior 179
 Regional cerebral blood flow 115
 Response force 211

S

Schedule controlled behavior 49
 Schedules of reinforcement 301
 Schizophrenia 75
 Scopolamine 21, 301
 Serotonin 157, 235, 255, 343

Shock-induced aggression 305
 Signal detection 173
 Sleep 221
 — parameters 69
 Slow-release pellets 293
 Social behaviors 293
 Spontaneous recovery 301
 Stereotyped behavior 211, 233, 239
 Streotopy 293
 Stimulus-shock termination 153
 Striatum 163
 Substantia nigra 261
 Supersensitive receptors 317

T

Tardive dyskinesia 75, 145
 Taste aversion 21, 45
 Δ⁹-THC 269
 T-maze 179
 Tolerance 27, 139, 269, 279, 343
 Total blood 5-HT 195
 Toxicity 113
 Tricyclic antidepressants 335
 Trimethobenzamide 21

U

Undernourishment 93
 Unit activity 261

V

Vision 81

W

Waking suggestibility 217
 Withdrawal emergent symptoms 157
 Withdrawal syndrome 269

L
